The bridge to possible

Cisco Remote Workforce Network Solutions for Business Resiliency

Today's workers are no longer bound to primary workplaces. Reimagine and redesign your workforce by extending secure enterprise network connectivity to your remote workers at home and at micro-offices. Give them an enhanced application experience, with solutions that can be centrally managed.

Benefits

Remote Workforce Network solutions offer an enterprise-class experience for remote employees and IT administrators. Get centralized management, monitoring, and troubleshooting in two discounted solution bundles, for wireless and routing.

When you order a Cisco Remote Workforce Network solution, your subscription is activated through a single Cisco DNA Remote Workforce Network bundle for simplicity. You can also use your existing Cisco products or choose from a variety of discounted hardware options for both wireless and routing.

The bridge to possible

Cisco Remote Workforce Network solutions

Cisco Remote Workforce Wireless solutions	Cisco Remote Workforce Routing solutions
Seamlessly onboard remote workers with plug-and-play Cisco access points, including Cisco Catalyst 9105 series. Securely connect users' wired and wireless devices to your network with enterprise-class identity-based policies. Users enjoy an optimized application experience through the direct Internet access and Cisco technologies such as CleanAir, and advanced Radio Resource Management (RRM).	Provide an enhanced SD-WAN and multicloud application experience using Cisco Integrated Services Routers (ISR) with built-in Wi-Fi and WAN optimization. Get always-on consistent network connectivity with end-to-end policy-based segmentation and advanced security to extend enterprise network to your home office environment.
Setting up a Remote Workforce Wireless solution is simple:	Our Remote Workforce Routing solution offers multiple options:
1. Order a 3-year subscription to the Cisco DNA Remote Workforce Wireless software, available at a discount of up to 30%.	1. Order a 3-year subscription to the Cisco DNA Remote Workforce Routing software, available at a discount of up to 90%.
2. Choose one of the following options: • Use your existing Cisco Catalyst 9100 Series or Cisco Aironet 1800, 2800, 3800, or 4800 Series Access Points with the subscription. • Add selected access points models to the bundle at a discount of up to 30%.	2. Choose one of the following hardware options: • Use any of your existing SD-WAN-supported Cisco 1100 Series Integrated Service Routers. • Add either the Cisco ISR 1101 or the Cisco ISR 1121X to the bundle at a discount of up to 70%.
You can also add to your bundle the options of Cisco Umbrella cloud security at a discounted price and free power injectors.	You can also add optional Cisco SD-WAN Cloud OnRamp, Cisco SD-WAN vAnalytics, and Cisco Umbrella capabilities to your bundle. The Cisco Remote Workforce Routing solution offers 12- and 36-month financing options, provided by Cisco Capital.
